

Some L^AT_EX utils

jlh

June 14, 2021

This document demos some things I've collected for nicer texing. For instance, underlines like this example.

Also, citations with auto links, like this: check out the link in the references when I cite, e.g. MacKay (2003). Links are auto-generated from the `url`, `doi`, etc. fields.

Simple titled box

For a box like this, use the `kast` environment.

Information theory operators, for things like this:

$$I(X; Y) = D_{\text{KL}}(P_{(X,Y)} \parallel P_X \otimes P_Y) = \mathbb{E}_{p_{(X,Y)}} \left[\log \frac{p_{(X,Y)}(x,y)}{p_X(x)p_Y(y)} \right] \quad (1)$$

$$= H(X) - H(X \mid Y) \quad (2)$$
